

The Company is into the business of trading of plastics products and plastic granules. It considers the plastics, low-density polyethylene (LDPE) and linear low density polyethylene (LLDPE.) which are widely used polymers. This segment of polymers is maintained at the same level. More than 50% of LDPE/ LLDPE are used by the packaging industry. The second most used polymer in India is HDPE. The value of its domestic consumption is growing at expected level due to increase in all round of usage of plastics. HDPE is used in the manufacturing of raffia, blow molding, injection molding, and in the paper industry as well. The majority of manufacturing capacities are owned by the big industrial houses.
